

MyHaifa Micro Mix

Customized micronutrients

Multi-K® potassiumnitrate, Haifa MKP® and Haifa MAP®: these fertilizers are used throughout the world in (greenhouses) horticulture and have been produced by Haifa for many years. Now Haifa introduces a tailormade blend of micronutrients: MyHaifa Micro Mix.

With MyHaifa Micro Mix there's no need to work with standard mixes anymore, just compose your own mix and exactly meet your crops requirements.

The following options are available:

- EDTA, DTPA, EDDHA, HBED or sulphate based micronutrients
- Sodium (Na) free formulas possible
- Packaging: 5 kg bucket or 25 kg bags
- Possibility to add magnesium and calcium EDTA chelate
- Possibility to add magnesium sulphate

How does it work?

- Login to the online MyHaifa Micro Mix website : www.myhaifa-mix.be
- Select 'New Order'
- Select or create 'Customer'
- Choose blender: MyHaifa Micro Mix 'region'
- Create a name for the MyHaifa Micro Mix (this name will be printed on the label)
- Choose the 5kg (bucket) or 25kg (bag) packaging
- Fill in the required quantity
- Choose a delivery date
- Make your own composition based on the raw materials
- Print the datasheet/infosheet
- Directly order via the MyHaifa Micro Mix system
- Depending on your location you receive the order within 1 to 3 weeks
